## *Boise Unified School District Head Lice Update*

### Head Lice Information for Parents

*The Boise School District has determined that the former head lice policy is outdated. As a result, there have been a few changes to the way the district will handle cases of lice. Head lice can be a nuisance but they do not carry any secondary infections and pose no health risks. Personal hygiene or cleanliness in the home or school has nothing to do with getting head lice. Head lice are mostly spread by direct head-to-head contact for example; during play at home, sleepovers, or sports activities. Head lice cannot jump or fly, they only move by crawling. It is unlikely to find head lice living on objects like helmets or hats because they have feet that are specifically designed to grasp on to the hair shaft of humans. Because of this, the risk of spreading lice in an academic environment is very low.*

*Consequently, The Boise School District has determined that students diagnosed with live head lice do not need to be sent home early from school; they can go home at the end of the day. Students may be treated, and return to class after appropriate treatment has begun. Additionally, the district will no longer send home letters to inform families if a student in your child's class has a case of lice. Research has proven that this protocol has no effect on the reduction of cases of head lice and it violates the FERPA & ethical standards for student privacy. However, by request of a student's guardian, the school health services staff may screen individual children or provide counseling to students.*

*Please look for additional educational materials from your school nurse on the identification, treatment and spread of head lice.*
